Get Better Health

By SAYAN MUKHERJEE, April 23,2018

Better Health prides itself on providing "smart health commentary". With the site's wide array of informative articles, videos, and audio files about healthcare services, Better Health is a useful tool to guide both patients and medical professionals in the field. Aside from news articles about the latest healthcare trends, readers can also expect professional opinion and health tips from the pros themselves.

Healthcare Economist

DEEPRAJ BHOWMICK, April 22, 2018

Does the country's healthcare system give you a pain in the neck because of all its complexities? Healthcare Economist gives you the education that you need in a comprehensible, conversational manner. The website tackles all issues relating to healthcare policy and economics, which include the health insurance market as well as important updates and research on the Medicare policy.

The Complete Herbal Guide

JOY ROY, April 21, 2018

This blog offers the real deal when it comes to a one-stop-health blog. The Complete Herbal Guide does not provide one-track articles but comprehensive content on health performance, health research as well as community support and products to help readers improve their health and lifestyle so they can live their life in optimum health.

Digital Health Nexus & Data Innovators Advisory Service

RAHUL ROY, April 20, 2018

This health blog is spawned by health IT, digital med device inventor, and entrepreneur Sayan Mukherjee, which provides interesting facts and news articles on health in relation to today's digital world. As we know, technology has become a part of our lives, and what better way to make life better and healthier than to apply digital advancements and IT to healthcare? From cloud computing to health engineering, readers will be filled with a myriad of useful new information.

Your diet and your heart

SAYANTIKA DUTTA, April 19, 2018

The expression 'you are what you eat' is most true of all where your heart is concerned. What you put into your body has a huge impact on your liver, your bowel, your kidneys, your brain – but also your arteries, which supply all your organs with vital oxygen.

Body in Mind

RAUSHAN KUMAR DINKAR, April 18, 2018

The author wants to better facilitate and disseminate credible clinical science research. He wants to communicate our science better. He wants to side-step, or perhaps leap-frog, the arduous journey that new discoveries make before they have the opportunity to influence clinical practice. What does Body in Mind want to communicate, exactly? Advances and issues in the clinical sciences as they relate to the role of the brain and mind in chronic pain disorders. There are three subplots they would like to convey, summarized by the three 'C's: complexity, credibility and creativity
